- Self Confidence.
- Dedicated to job.
- Positive approach.
- Adaptable to changes.
- Ability to learn new Technologies
- Motivated team player

ABOUT ME

My fascination with computers began when I was in school. In my spare time I used to explore various application softwares especially those used for photo and video editing. Soon after, I was able to get an internet connection at home and that opened the whole World Wide Web to me. I was amazed with the endless opportunities in the Web World and decided to choose Visual Media as my career path. After completing school, I did a course in multi-media software packages and started my career as a video editor. In addition to media-related application softwares, I was also keen on learning about computer hardware and did a course on that as well. From video editing, I gradually moved to Web designing and I have been doing that ever since.

I love my job; the web pages and advertisements I create for my clients are the results of hard work, technical skills and creativity. In my career so far, I have worked for companies in Kerala, Bangalore and also in Bahrain. Currently I am working as a freelance designer and my clients include well-placed companies in India and abroad. You are welcome to view samples of my work on the Portfolio page of this site.
