

WHAT IS INVOICE DISCOUNTING?

Invoice Discounting is an old practice used by businesses to raise funds for short-term working capital needs by selling their bills receivables to financial Institutions at a discount. This allows business to unlock their cash from the bills receivables and manages their working capital requirements

WHAT IS KredX?

KredX is India's leading Invoice Discounting market place helping businesses grow by providing collateral-free working capital through invoice discounting. As opposed to a traditional payment tenure of 30-90 days, business can now access the required funds in just 24-72 hours, thereby ensuring a healthy cash flow and subsequent business growth.

How it Works?

Business Raises invoice on blue chip company for service/product already provided payable in 45 days.

Kredx verifies business, blue – chip company, the invoice and lists it on the KredX platform

Investor buys the invoice at a discounted rate for high returns.

Funds provided by investor are disbursed to the business in 1-2 days

Investors receives invested amount + interest from blue-chip company at the end of 45 days.
